EDUCATION

University of California, Irvine, *Irvine, CA*   **June 2018**
B.S. in Computer Science; B.A. in Business Administration
GPA: 3.76

COMPUTER SKILLS

- Programming: Python, Java, C++, JavaScript, HTML, CSS
- Software: Microsoft Excel, GitHub, Linux, Sublime Text, Unity

WORK EXPERIENCE

JoyRun, *Irvine, CA*   **February 2016 – Present**
Brand Champion
- Implemented promotional campaigns to encourage college students to download JoyRun, a mobile application that provides a cheap food-delivery service to the UC Irvine community.
- Employed my entrepreneurial skills to influence JoyRun's marketing strategy and maintain overall retention of users.

IAC Applications, *Yonkers, NY*   **June 2015 – August 2015**
JavaScript Engineer Intern
- Researched, developed and tested a Google Chrome extension for users to check the live scores of their favorite teams and sports, including displays from NBA, NFL, MLB, and NHL.
- Redesigned Google's new tab page by creating an extension that shows a scrolling stock ticker when opening a new tab.
- Proposed and built a solution that improved IAC's existing toolbars by implementing a notifications feature that guides the user to enable their bookmarks bar on Chrome.

ACTIVITIES

HackUCI, *Irvine, CA*   **September 2014 – Present**
Director of Corporate Outreach
- Raised $21,000 in sponsorship money from companies, including Cylance and Microsoft, via cold calls for UC Irvine's annual hackathon, HackUCI.
- Led a team of eight members, organized weekly meetings, and managed communication between HackUCI and top sponsors to bolster long-term relations.

Management Information Student Society, *Irvine, CA*   **September 2015 – Present**
Mentor
- Advised students with interests in business and technology by helping them select classes, learn computer programming, revise their resumes, and prepare for interviews.

ICS Lab Tutors, *Irvine, CA*   **Spring 2015, Fall 2015**
- Created review materials, offered one-to-one tutorial sessions, and assisted 20+ students in introductory programming courses by answering questions related to lab assignments and helping students debug their code in Python.

PROJECTS

Android Application Developer   **October 2013**
- Marketed my band, The Simple Approach, by building an Android application where users can listen to our eleven original songs on SoundCloud and watch our live recordings on YouTube.
- Launched *E-News*, an Android application with over 1,200 downloads on the Google Play Store, so that users can easily access popular news websites.
